TECHNICAL SKILLS

Backend

- Node.js, Express.js, NestJS
- RESTful API development
- JWT, RBAC
- CRUD operations
- Error handling & validation

Frontend

- HTML5, CSS3
- JavaScript (ES6+), TypeScript
- React, React Router
- Tailwind CSS
- Responsive design

Databases

- PostgreSQL, MongoDB
- Prisma, TypeORM, Sequelize, Mongoose
- Database relations & SQL

Tools

- Git, GitHub
- Postman
- Docker
- Figma

LANGUAGES

- Uzbek (native)
- English (advanced)
- Russian (advanced)

PROFILE

Junior Full-Stack Developer with hands-on experience building web applications and RESTful APIs using React, Node.js, NestJS, and PostgreSQL. Developed backend systems similar to Netflix, food delivery platforms, and hospital management systems. Strong understanding of authentication, database design, and clean architecture. Motivated to grow professionally and build real-world products.

PROJECT EXPERIENCE

Gym Management System (Full Stack)

Tech: Node.js, NestJS, React.js, Prisma, PostgreSQL. Developed a comprehensive full-stack CRM solution for fitness centers. Designed a modular NestJS backend with Prisma to manage complex relationships between gyms, users, and membership plans. Implemented advanced security via JWT and Role-Based Access Control (RBAC). Built a dynamic React frontend featuring real-time analytics dashboards, attendance tracking via check-ins, and financial reporting.

Food Delivery Backend API

Tech: Node.js, NestJS, TypeScript, SQL, Postman — Developed a RESTful backend API for a food delivery system, designed endpoints for users, menus, orders, and checkout workflows, structured the application using modular NestJS architecture, created SQL scripts for database setup and relations and documented.

Hospital Management System API

Tech: Node.js, NestJS, PostgreSQL, Prisma — Designed and developed a backend system to manage patients, doctors, and appointments, implemented JWT-based authentication and role-based access control, built REST APIs for scheduling, medical records, and user management, modeled relational database schema using PostgreSQL and Prisma ORM, followed modular backend architecture and clean code practices

EDUCATION

Najot Ta'lim — Fullstack Web Development

TUIT, Economics, 2nd year student

High School Diploma — Tashkent, Uzbekistan
